Fleet Management

Get the complete 360° view of your fleet

Trakm8 Insight is a market leading software platform that processes data from telematics devices, connected cameras and mobile apps and displays them in digestible and user-friendly dashboards

Insight Telematics

Insight Essentials

Low-cost, simple live GPS vehicle tracking combined with driver behaviour. Ideal for grey-fleet, short-term hire and contractor vehicles.

- Live Vehicle Tracking
- Driver Behaviour
- Business/Private Mileage
- Mileage Reports
- Geo-fences
- Reminders (Service, MOT etc.)

Insight Business

No-nonsense vehicle tracking with vehicle health, driver behaviour, business/private mileage, geo-fencing and service & MOT reminders.

- Everything in Essentials +
- Vehicle Health
- Live Fuel, Battery & Odometer
- Additional Reports
- Customisable Dashboards, Reports and Alerts
- Connectedcare (Advanced Vehicle Health)
- Vehicle Checks

Optional Modules:

- Live Video Streaming
- Driver ID

Insight Enterprise

The customisable Insight package, precisely tailored to your needs. Select the Insight features that you need for your business including Optimisation and ePOD.

Optional Modules:

- Fleet Optimisation and Route Planning

Insight Optimisation

Insight Optimise

For companies whose focus is to quickly reduce fleet operating cost (and emissions) by 10-20% in order to transform their mobile workflow.

- Job Management
- Automated Route Planning
- Export & Print Planned Routes
- Vehicle & Driver Management
- Visualise Routes & Jobs

Insight Dispatch

For companies who want to turbo-charge growth by providing their customers with the best delivery experience and customer service.

- Job Management
- ePOD
- Export & Print Planned Routes
- Vehicle & Driver Management
- Visualise Routes & Jobs

Insight Optimise & Dispatch

For companies who want the power of full functionality to grow their business while reducing environmental impact and operating costs.

- Everything in Dispatch +
- Automated Route Planning

Insight Enterprise

A fully customisable fleet management solution tailored to the needs of your business with optional telematics solutions.

- Everything in Optimise & Dispatch +
- Live Vehicle Tracking (Optional)
- Driver Behaviour (Optional)
- Vehicle Health (Optional)
- Live-streaming Video (Optional)
- Third-party Integration (Optional)

Trakm8 Telematics Devices

Connect 150 Tracker For Unpowered Assets

The C150 is a waterproof GNSS (Global Navigation Satellite System) tracker that is designed for fixed asset tracking applications. It is powered by an internal battery pack allowing more than 1800 days standby time. It supports a flexible switch between continuous mode (real time monitoring) and power save mode which periodically confirms asset status.

Connect 200 12V Plug-in Tracker

Compact and cost effective tracking and driver behaviour device that fits directly into the cigarette lighter.

Connect 210 12V 2 wire Battery Mounted Tracker

The Connect 210 is a compact and cost effective 2 wire device that fits directly to the vehicle battery and is ideal for the insurance market.

Connect 330 OBD Self-Install Device

The Connect 330 has been developed to process and provide telematics data including vehicle diagnostics. It is fully certified and connects via GPRS with all functions fully enclosed within one of the smallest telematics devices available on the market.

Connect 430 3 & 12 Wire Hardwire Device

Engineered specifically for the insurance and fleet sectors, the Connect 430 is a compact and robust device which is designed to be quickly and easily hard-wired to a vehicle including a self install option. Through deep CANbus connectivity, it provides rich insights into driver behaviour and vehicle status, as well as highly-accurate GPS location data.

Connect 500 Ruggedised Hardwire Device

The Connect 500 is the latest product to be developed by Trakm8 and is the market leading 2G telematics device. The rugged, waterproof, IP69K rated device has been designed to provide Fleet Managers with some of the most precise vehicle and driver behaviour data available today.

RH600 Integrated Telematics 4G Camera

Why waste time and money installing separate cameras and vehicle trackers? Take road safety and fleet efficiency to the next level with the award-winning RH600, the first 4G vehicle camera combined with fully featured telematics.

Driver ID Via Dallas Key ACC710

The ACC710 Accessory is a low energy Bluetooth device that connects wirelessly with compatible Trakm8 telematics devices to deliver a wide range of functionality at the drivers fingertips.

In-cab Driver Feedback & Driver ID ACC750

The ACC750 is a combined driver identification and feedback solution that connects to a wide range of Trakm8 devices over wired and wireless connections.
