

VT202

Hardwired Asset Management Solution

- ✓ Full Visibility 24/7
- ✓ Ultra Powerful GPS
- ✓ Journey History
- ✓ IP67 Robust & Waterproof
- ✓ Compact Size

VT202

Hard Wired asset management solution, self-installed or installed by an AMI engineer. Our flagship GPS tracker with a host of accessories and additional features to suit your ever-changing requirements. Complete with all of the AMI features our customers enjoy with the additional benefits of immobilisation, Driver ID (Keypad (optional extra), Driver Card or iButton Key), Wireless Temperature Sensors, Panic Buttons, Volumetric Sensors and much more.

Multi-Network SIM cards

Utilising multiple networks on AMI's private APN system the unit is always reporting on the strongest available network, providing the best coverage worldwide.

Servicing Manager

AMI Nexis displays an assets milage / running hours and updates in real-time. The servicing manager screen will also alert you when an asset is approaching a service / MOT call giving you key visibility & maintenance over your fleet.

Journey History

A vehicles journeys can be viewed following the occurrence by selecting a start and end date and time within both the map and list view section of the Nexis platform. This also includes a vehicles speed giving the user further insight into the drivers behaviour.

Range of Immobilisation Features

Enjoy added protection with theft prevention thanks to our range of immobilisation features including; keypad (optional extra), scheduled and remote immobilisation to lockdown an asset.

Powerful GPS Technology

With its built in GPS antenna the VT202 can be concealed in a range of locations without signal interference. The GPS technology ensures a pin-point location is achieved and plotted on the map to track a live journey and stored on the Nexis platform to look back on, at a later date.

Live Tracking

The VT202 unit reports its date live which is visible via the Nexis platform and mobile apps. The positional data is then plotted live on a map also displaying an assets speed in real-time.

Hardwired Asset Management Solution

Geo-fence Technology

An invisible barrier tailored by the user to alert you to an asset entering or exiting and designated area, stay in the know and always be one step ahead of the thieves with alerts direct to you .

Out of Hours Usage Alerts

Be alerted in real-time if an asset is used outside of your working hours with tailored alerts via our Nexis platform / mobile apps. All alerts are tailored to you and sent via email / SMS or push notifications.

Integrated Battery Back-up

Internal battery back up allows for the unit to work even when a power source is disconnected, sending battery disconnection alerts to the user to notify them of a tamper. This has saved our customers thousands in nearly battery thefts.

Technical Specification

Physical -

- Dimensions: 72.5 x 73 x 27.3 mm
- Power: 10 - 30 V DC with over voltage protection
- Battery: Internal Battery included
- Sensors: Accelerometer and gyroscope
- Weigh: 205 g
- Temperature: -20 °C to +45°C
- Waterproof: IP67 Rated

Communication:

- Quad-band 850 / 900 / 1800 / 1900 MHz
- Communication protocol:TCP
- Positioning: GPS
- Antennas: Internal

Award Winning Technology

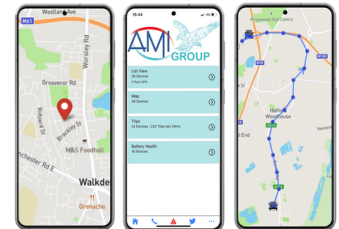

Over the years AMI Group have been recognised by many award bodies for our range of solutions being highly commended as 'supplier of the year' and 'best in battery operated technology' to name a few.

Multiple country inclusion

By utilising multi-network sim cards the unit will report on the strongest possible network available this is not just in the UK but within 27 EU countries inclusive within the annual service fee at no extra cost.
